1. Principal activities

“The State Export-Import Bank of Ukraine” Joint Stock Company (hereinafter – “Ukreximbank” JSC or the Bank) was founded in 1992 and entered into the State Register of Banks on January 23, 1992 under No. 5. The Bank operates under Banking licence No. 2.

As at September 30, 2022 and December 31, 2021, 100% of Ukreximbank’s shares were owned by the state represented by the Cabinet of Ministers of Ukraine.

Ukreximbank’s head office is located in Kyiv at 127, Antonovycha Str. It has 22 branches and 29 sub-branches (December 31, 2021: 22 branches and 38 sub-branches) and two representative offices located in London and New-York. Ukreximbank and its branches form a single legal entity.

Traditionally, the main focus of Ukreximbank’s operations was the servicing of various export-import transactions. Currently, Ukreximbank’s customer base is diversified and includes a number of large industrial and state-owned enterprises. Ukreximbank accepts deposits from entities and individuals, issues loans, transfers payments in Ukraine and internationally, exchanges currencies, makes investments, provides settlement and cash service to customers, and renders other banking services.

One of Ukreximbank’s main activities is to facilitate, on behalf of the Ukrainian Government, the administration of loan agreements entered into by the Ukrainian Government with other foreign governments. Ukreximbank acts as an agent, on behalf of the Ukrainian Government, with respect to loans from foreign financial institutions based on the aforementioned agreements.

The Bank’s aim (in accordance with the Charter) is to create favourable conditions for the economic development and support of the domestic producers, to service export and import operations, to provide credit and financial support of restructuring processes, to strengthen and implement the industrial and trade potential of the industries and manufacturers that are export-oriented or carry out the activities related to the production of import-substituting products, and also to receive gains in favour of the Bank and its shareholder.

Ukreximbank prepares interim condensed financial statements and interim condensed consolidated financial statements that comprise the consolidated performance indicators of the Bank and its subsidiaries “Lease Company “Ukreximleasing” and “Eximleasing” LLC.

“Lease Company “Ukreximleasing”, Ukreximbank’s 100% owned subsidiary, was founded in 1997 and is registered and operates in Ukraine in the trading and leasing business.

“Eximleasing” LLC, Ukreximbank’s 100% owned subsidiary, was founded in 2006 and registered in Ukraine, and operates in the trading and leasing business.

2. Basis of preparation and summary of significant accounting policies

These interim condensed consolidated financial statements for the nine months ended September 30, 2022, have been prepared in accordance with the International Accounting Standard 34 *Interim Financial Reporting*.

These interim condensed consolidated financial statements do not include all information and data subject to disclosure in the annual financial statements and should be read in conjunction with the Bank’s annual consolidated financial statements as at 31 December 2021, which have been prepared in accordance with IFRS and posted on the Bank’s website at <https://www.eximb.com/ua/bank/financial-information/financial-report/financial-report-2021.html>.

These interim condensed consolidated financial statements are presented in thousands of Ukrainian hryvnia (“UAH thousand”), unless otherwise indicated.

Going concern

These interim condensed consolidated financial statements for the nine months ended September 30, 2022 have been prepared on a going concern basis. In preparing the financial statements for the nine months of 2022, the Bank’s management assessed

(UAH thousand, unless otherwise stated)

the Bank's ability to continue its activities in the future, taking into account the ongoing hostilities in Ukraine that have already caused significant negative consequences for the economy of the country as a whole and for the customers of the Bank. The Bank's management believes that over the next 12 months the Bank will meet its obligations on time and in full. Besides, the Bank plans additional lending to strategic corporate customers. The source of repayment of liabilities and increase in lending will be accumulated liquidity, redemption of Ukrainian state bonds and government-guaranteed corporate bonds, as well as, if necessary, attracting the NBU's refinancing loans.

In October 2022, the Bank violated the requirements of the NBU on N2 and N3 capital ratios in connection with the provisioning to cover losses in connection with the military aggression of the Russian Federation against Ukraine. However, in accordance with the Resolution of the National Bank of Ukraine No. 23 dated February 25, 2022 (as amended), during the martial law, no measures of influence are applied to the Bank for violations of capital, liquidity, credit risk and investment ratios. The Bank plans to settle the issue of compliance with the ratios after the end of martial law by implementing measures that were predetermined in the Recovery Plan.

Based on forecast liquidity, expected credit losses, and the possibility of additional capitalization, the Bank's management believes that there are sufficient grounds for preparing these financial statements on a going concern basis.

However, there is a material uncertainty, related to the unpredictable impact of ongoing hostilities on the territory of Ukraine on the assumptions underlying management's assessments that may cast significant doubt on the Bank's ability to continue as a going concern, and, therefore, it may be unable to realise its assets and discharge its liabilities in the normal course of business.

Reclassifications

In preparing the consolidated financial statements for 2021, the Bank decided to approximate the format of disclosure of indicators and line titles of the main forms of financial statements to the format of financial statements in accordance with international standards in a single electronic format, approved by the Order #595 of the Ministry of Finance of Ukraine “On Approval of Translation of the Financial Statements Taxonomy according to International Financial Reporting Standards 2021” dd. 12 November 2021.

Accordingly, some changes have been made in the presentation of comparative information for 2021 in these interim condensed consolidated financial statements for the nine months ended September 30, 2022, to bring it in line with the new reporting format.

Specifically, the following reclassifications were made in Interim Condensed Consolidated Statement of Profit and Loss:

- ▶ (a) net (losses)/ gains on investment securities at fair value through profit or loss and net gains / (losses) from transactions with derivatives are presented by separate item “Net gains / (losses) from transactions with financial instruments at fair value through profit or loss”;
- ▶ (b) net gains / (losses) from dealing in foreign currencies and net gains / (losses) from dealing in precious metals are presented by separate item “Net gains / (losses) from dealing in foreign currency”;
- ▶ (c) net gains / (losses) from translation differences on trading in foreign currencies and net gains / (losses) from revaluation of precious metals are presented by separate item “Net gains / (losses) from foreign exchange translation”;
- ▶ (d) expenses for expected credit losses and expenses for expected credit losses on credit-related commitments are presented by separate item “Impairment gain and reversal of impairment loss (impairment loss) determined in accordance with IFRS 9”;
- ▶ (e) gains on initial recognition of financial assets at interest rates above or below market were combined with losses on initial recognition of financial assets at interest rate above or below market;
- ▶ (f) net losses on modification of financial assets at amortised cost and other operating expenses were combined with other administrative and operating expenses;
- ▶ (g) impairment gain and reversal of impairment loss (impairment loss) for non-financial assets are presented by separate item.

The table below shows the effect of respective reclassifications on disclosures in the Interim Condensed Consolidated Statement of Profit and Loss for the nine months ended September 30, 2021:

The respective changes were made in the comparative information presented in the notes to the interim condensed consolidated financial statements for the nine months ended September 30, 2022.

Operating environment

In the third quarter of 2022, the economy of Ukraine continued to be affected by the full-scale military invasion of Ukraine by the Russian Federation, which began on February 24, 2022.

In September, consumer inflation in Ukraine was 24.6%. The main factors in the growth of inflation remain the consequences of the full-scale war of the Russian Federation against Ukraine. Among them: disruption of supply chains, destruction of production facilities, reduction in supply of goods and services, increase in business costs. Another pro-inflationary factor was the effect of transferring the adjustment of the official exchange rate of hryvnia to US dollar on prices. Further growth of inflation in the world also affected prices in Ukraine.

At the same time, the actual price dynamics were expected and even slightly lower than the July NBU forecast. The fixation of tariffs for housing and utility services and the saturation of the domestic market with fuel, together with the preservation of its preferential taxation, inhibited the growth of prices. The planned reduction in the amount of budget monetization, as well as additional measures of the NBU to calibrate currency restrictions contributed to reducing the pressure on the foreign exchange market and, accordingly, restrained the deterioration of expectations.

Inflation will reach about 30% this year, but it should slow down in the coming years, provided security risks are reduced and monetary and fiscal policies are coordinated. The NBU expects price growth to start slowing down next year due to the gradual recovery of logistics and production, lower global inflation and moderately tight monetary conditions.

(UAH thousand, unless otherwise stated)

Economic activity in the II-III quarters of 2022 slowly recovered due to the further liberation of Ukrainian lands, business adaptation to new conditions and the operation of the "grain corridor". The latter factor led to a positive contribution to GDP compared to the July forecast. However, the existing logistical problems, especially in metallurgy, the destruction of capacities, in particular in energy, and the decrease in real incomes of the population hold back the recovery of the economy. Agriculture is also expected to have a significant negative contribution to the change in real GDP - both due to lower yield indicators this year and much smaller cultivated areas. Because of this, the NBU only slightly improved the estimate of the fall in GDP in the current year - to 31.5%.

Further cooperation with international partners remains an important factor in maintaining the functioning of the economy in the conditions of a full-scale war and post-war recovery.

Maintaining exchange rate stability and protecting international reserves requires ensuring an attractive yield on hryvnia assets over a long period of time. This, in particular, will be facilitated by maintaining the discount rate at the current level. Interest rates on hryvnia deposits continue to rise in response to the June increase in the discount rate on a trajectory close to the expected.

The (net) assets of the banking system of Ukraine increased to UAH 2,168 billion at the end of the third quarter of 2022 (+ UAH 114 million equivalent compared to December 2021), which is mainly due to the growth of balances on correspondent accounts opened in other banks (+ UAH 97.8 million equivalent), as well as an increase in lending to business entities (+ UAH 40.9 million equivalent). The increase in liabilities occurred primarily due to an increase in the amount of liabilities (+ UAH 158 million eq.), which, in turn, increased mainly due to the growth of balances on the accounts of individuals (+ UAH 134 million eq. compared to December 2021).

The banking sector of Ukraine received a profit of UAH 7.4 billion for 9 months of 2022, despite significant deductions to reserves of almost UAH 99 billion (by UAH 91.3 billion more than for 9 months of 2021).

This review of the macroeconomic environment is based on a pre-published limited list of information and does not fully reflect the results of the impact of the Russian Federation's attack on the economy of Ukraine.

Changes in accounting policies

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Bank's annual financial statements for the year ended 31 December 2021, except for the adoption of the new standards described below effective as at 1 January 2022. The nature and the effect of these changes are provided below.

Amendments to IFRS 3 – “Reference to Conceptual Principles”

In May 2020, the IFRS Board issued amendments to IFRS 3 Business Combinations - Reference to Conceptual Principles. The purpose of these amendments is to replace the reference to the Concept of Preparation and Presentation of Financial Statements, issued in 1989, with the reference to the Conceptual Basis of Presentation of Financial Statements, issued in March 2018, without making significant changes to the requirements of the standard.

The Board also added an exception to the principle of recognition in IFRS 3 to avoid potential profit or loss on Day 2 for liabilities and contingent liabilities that would fall within the scope of IAS 37 or Clarification of IFRIC 21 “Mandatory Payments” if they arose from individual transactions.

At the same time, the Board decided to clarify the existing requirements of IFRS 3 for contingent assets, which will not be affected by the replacement of references to the Financial Reporting Concept.

These amendments do not have a material impact on the Bank's consolidated financial statements.

Amendments to IAS 16 – “Fixed assets: receipts for intended use”

In May 2020, the IFRS Board issued a document "Fixed assets: receipts for intended use", which prohibits organizations to deduct from the original cost of fixed assets any proceeds from the sale of products, produced in the process of delivery of this object to the location and bringing it to the condition required for its operation in accordance with the intentions of management. Instead, the organization recognises the proceeds from the sale of such products, as well as the cost of production of these products as part of profit or loss.

(UAH thousand, unless otherwise stated)

These amendments do not have a material impact on the Bank's consolidated financial statements.

Amendments to IAS 37 – “Onerous Contracts – Contract Performance Costs”

In May 2020, the IFRS Board issued amendments to IAS 37, which clarify what costs an entity should consider when assessing whether a contract is onerous or unprofitable.

The amendments provide for an approach based on "costs directly attributable to the contract". Expenses directly related to the contract for the provision of goods or services include both additional costs for the performance of this contract and distributed costs directly related to the performance of the contract. General and administrative costs are not directly related to the contract and are therefore excluded, unless they are explicitly subject to reimbursement by the contractor.

These amendments do not have a material impact on the Bank's consolidated financial statements.

IFRS 9 “Financial Instruments” – “Commission Fees during “the 10% Test” for Derecognition of Financial Liabilities”

As part of the annual IFRS improvement process for the period 2018-2020, the IFRS Board has issued an amendment to IFRS 9. The amendment specifies the composition of the amounts of commission fees that the entity considers when assessing whether the terms of a new or modified financial liability differ significantly from the terms of the original financial liability. Such amounts include only those commissions that have been paid or received between the creditor and the borrower, including commissions paid or received by the creditor or the borrower on behalf of the other party. An entity shall apply this amendment to financial liabilities that have been modified or replaced at the beginning (or after) of the annual reporting period in which the entity first applies the amendment.

This amendment does not have a material impact on the Bank's consolidated financial statements.

3. Segment information

For management purposes, the Bank recognises the following operating segments (business units):

Corporate banking	business segment that focuses on servicing corporate customers and selling the products that require an individual approach and are mainly offered to corporate clients.
Medium-sized business, municipalities and utilities sector	business segment aimed at servicing customers of municipalities and utilities sector, small and medium-sized business (including individual entrepreneurs) and the sale of products provided mainly in a standardised form (according to approved tariffs and standard procedures).
Retail banking	Business segment that focuses on servicing individuals (except individual entrepreneurs) on the full list of products, and selling products that are provided to individuals (population) mainly in a standardised form (as per the tariffs approved and the standard procedures) and generally do not require any individual approach to be applied.
Interbank and investment business	business segment that focuses on providing services to participants in the financial markets (money, currency, stock, etc.) and on selling the products related to transactions in the financial markets.

The management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Business units performance, as explained in the table below, is measured taking into account income and expenses from other business units.

Unallocated amounts include:

- ▶ income tax receivables and payables, the share of unallocated assets and costs associated with the work of the Bank's top management, i.e. personnel performing general management functions at the level of the whole Bank's system and personnel supporting directly the work of the top management;
- ▶ the result of revaluation of an open currency position of the bank (except for the portion of the open currency position allocated by the Bank for carrying out transactions on purchase/sale/conversion of cash foreign currency and precious metals and conversion of non-cash foreign currency);

(UAH thousand, unless otherwise stated)

- ▶ the difference between inter-segment revenues and costs of all business lines, obtained as a result of transfer rates application.

For the purposes of segment reporting interest is split on the basis of uniform transfer rates set by the Assets and Liabilities Committee based on the borrowing cost of the Bank.

During the nine months ended September 30, 2022, the Bank had revenues from transactions with a single external customer, that accounted for more than 10% of the Bank's total income, namely: UAH 2,720,760 thousand; (nine months of 2021: UAH 2,776,900 thousand). Revenue from transactions with this external customer is reported in the segment “Interbank and investments business”.

Analysis of the Bank’s revenue by banking products and services is presented in the interim condensed consolidated profit and loss statement in the items “Interest income” and “Interest expenses”.

The following table presents income and expenses, profit and loss, assets and liabilities of the Bank's operating segments for the nine months ended September 30, 2022:

Modified loans

The Bank derecognises a financial asset when the terms and conditions have been renegotiated to the extent that, substantially, it becomes a new financial instrument, with the difference recognised as a derecognition gain or loss, to the extent that an impairment loss has not already been recorded. The newly recognised loans are classified as Stage 1 for ECL measurement purposes, unless the new loan is deemed to be POCI.

If the modification does not result in derecognition, then, based on the change in cash flows discounted at the original EIR, the Bank records a modification gain or loss, to the extent that an impairment loss has not already been recorded.

The table below includes the Stage 2 and Stage 3 assets modified during the period, with the related modification loss:

The impact of military aggression and the imposition of martial law in Ukraine

The status of a state-owned Bank specializing in the financing of export-import transactions imposes a special role on the Bank during martial law in meeting the state's needs in financing the supply of critical imports and lending to strategic sectors of the economy for defence, food provisioning and humanitarian purposes, in particular in order to preserve the sovereignty of Ukraine.

Currently, the Bank has updated its credit policy, taking into account the beginning of the armed aggression of the Russian Federation against Ukraine. The Bank has identified a list of sectors of the economy to which it will provide priority credit support, namely the military-industrial complex, critical imports, the agricultural sector, the fuel and energy sector, infrastructure projects, export-oriented industries, humanitarian and social projects.

To date, the Bank has restricted foreign currency lending and will continue to provide credit support mostly in the national currency. Lending will be in foreign currency within the programs of international financial organizations (IBRD, EBRD, EIB), both current and new programs.

In order to support its customers faced with force majeure related to the military aggression of the Russian Federation against Ukraine, the Bank made a public decision to provide credit vacation for all borrowers - legal entities and individuals: payment deadlines on the principal debt, interest, commissions accrued as of 23.02.2022 and within the period from 24.02.2022 to 31.05.2022 are postponed till 30.06.2022. Borrowers - legal entities whose production assets have not been damaged as a result of hostilities and who are able to carry out operating activities, receiving income, continue to service debt to the Bank, paying interest.

The Russian military invasion to Ukraine necessitated an extraordinary revision of approaches and refinement of methods for estimating expected credit losses, including more detailed portfolio segmentation, application of expert judgments, and prompt processing of information on the current and projected state of hostilities and their impact on assets, operating activities, financial condition of debtors and their ability to meet monetary obligations to the Bank. Thus, the Bank reclassified the loan portfolio in stages, in particular, debtors whose main assets are located in the temporarily occupied territories and territories where active hostilities are taking place (depending on whether they have other assets, their ability to conduct or resume operating activities, including taking into account the forecasts for the liberation of the respective territories / cessation of active hostilities and their return to the control of Ukraine), as well as borrowers located in other territories, based on the risks of damage to property and assessment of their ability to conduct operating activities in the current conditions, forecasts of changes in the situation, were reclassified in stages and some debtors were transferred to Stage 2 or Stage 3. At the same time, for debtors with significant amounts of debt (regardless of whether the asset stage was worsened or whether it was classified as Stage 2 or Stage 3 before the war), the scenarios of receiving cash flows for debt repayment were revised, which involved changing repayment schedules and expert assessment of their receipt in different scenarios of further events. In addition, the calculation was reduced to zero for the expected cash flows from the sale of collateral which was destroyed during the

(UAH thousand, unless otherwise stated)

hostilities. Besides, the Bank made calculations to determine the increase in the amount of the provisions due to the war (calculation without applying appropriate changes to the methods and approaches to evaluation and comparing the result with the one of the calculation with the corresponding changes).

According to the Bank's estimates, the increase in the provisions for 9 months 2022 on loans, caused by the war, is UAH 10,565,808.4 thousand. The Bank will continue to collect and process information to ensure an adequate assessment of credit risks despite the uncertainties caused by the war.

12. Derivative financial instruments

The Bank conducts transactions with various derivative financial instruments, including forward transactions and swaps in the foreign exchange market, as well as interest rate swaps.

Forward transactions

(UAH thousand, unless otherwise stated)

The Bank enters into agreements certifying the obligation to purchase (sell) foreign currency at a specified time and on specified terms in the future with a fixation of the price of such sale (purchase) at the time of concluding the agreement.

Currency swap

The Bank conducts currency exchange operations, as a result of which the Bank is obliged to provide one currency in exchange for another one under pre-determined exchange rates.

Interest rate swap

The Bank enters into agreements with the NBU for the exchange of interest payments, which are calculated at different rates, but taking into account one notional amount during the agreement validity. The notional amount of loans (granted and borrowed) under the interest rate swap is used exclusively for interest calculations and is not transferred between the parties to the agreement.

As at 30 September 2022 the notional amounts are:

	<i>Notional amount</i>		<i>Fair value</i>	
	<i>Assets</i>	<i>Liabilities</i>	<i>Assets</i>	<i>Liabilities</i>
Currency swap	1 417 786	1 422 753	32 737	37 703
Interest rate swap	8 397 406	–	2 516 365	–

As at 31 December 2021 the notional amounts are:

	<i>Notional amount</i>		<i>Fair value</i>	
	<i>Assets</i>	<i>Liabilities</i>	<i>Assets</i>	<i>Liabilities</i>
Forward	62 420	62 295	125	–
Currency swap	417 694	417 496	205	7
Interest rate swap	8 647 406	–	582 412	–

To form the guarantee fund for interest rate swap operations, the Bank used investment securities – Ukrainian state bonds with the carrying amount of UAH 942, 549 thousand (31 December 2021: UAH 1,095,864 thousand) (Note 9).

13. Due to other banks

The provision for performance guarantees is included in other commitments.

Financial covenants

The Bank is a party to various agreements with other credit institutions, which contain requirements for the implementation of financial performance and overall risk structure of the Bank (capital adequacy, liquidity, credit risks). The benchmarks of indicators are set by the terms of agreements, other documents agreed upon by the parties to the agreements, with reference to both international and local regulatory requirements.

These financial covenants may restrict the Bank's ability to follow certain business strategies and be engaged in other significant future transactions.

Pledged assets

The Bank pledges as collateral assets stated in the consolidated financial statements in terms of various current transactions carried out under the normal conditions applicable to such agreements.

The following describes the methodologies and assumptions used to determine fair values for the financial instruments that are not recorded at fair value in the annual consolidated financial statements.

Assets whose fair value approximates their carrying value

For the financial assets and financial liabilities that are liquid or have a short-term maturity (up to three months), it is assumed that their carrying values approximate their fair values. This assumption is also applied to demand deposits, savings accounts without a specific maturity and variable rate financial instruments.

Fixed rate financial instruments

The fair values of fixed rate financial assets and financial liabilities carried at amortised cost are estimated by comparing the market interest rates at the date when they were first recognised with the current market rates offered for similar financial instruments. The estimated fair value of fixed interest-bearing deposits is based on discounted cash flows using the prevailing money-market interest rates for debts with similar credit risk and maturity. For listed debt instruments issued the fair values are calculated based on quoted market prices. For listed securities issued where quoted market prices are not available, a discounted cash flow model is used based on a current interest rate yield curve appropriate for the remaining term to maturity.

Analysis of financial instruments measured at fair value by level in the fair value hierarchy is presented in the table below:

21. Capital adequacy

The Bank extensively manages its capital adequacy for protection from risks inherent in the business. The adequacy of the Bank's capital is monitored using the ratios established by the NBU and Basel Capital Accord 1988.

The primary objectives of the Bank's capital management are to ensure that the Bank complies with the externally imposed capital requirements and maintains strong credit ratings and proper capital ratios in order to support its business activities and maximise the value to the shareholder.

The Bank manages its capital structure and adjusts it accordingly to reflect changes in economic conditions and the characteristics of the risks associated with its operations.

NBU capital adequacy ratio

The Bank's capital adequacy ratio was as follows:

	<i>30 September 2022 (unaudited)</i>	<i>31 December 2021</i>
